Notes

29/06/2026

Removed and replaced approximately 9 metres of rusted guttering with new guttering to restore the integrity of the stormwater system. Installed two new stop ends, new gutter brackets, and adjusted the existing outlet to align correctly with the downpipe, ensuring efficient water flow.

Additionally, replaced various rusted roof fixing screws around the lift shaft to maintain the roof's structural integrity and prevent potential water ingress. Sealed all identified areas that were exposed to the weather, providing a watertight finish and reducing the risk of future leaks.

Upon completion, all works were inspected and left clean and secure.
